456-21-CW	14/09/2021	4. Attached FOI 420-20-CW pertaining to "National policy for the Management, development and conservation of coarse fish species in Ireland " I wish to revisit/ resubmit this FOI. Original request: Referenced within the attached document co-authored by Dr Caffrey Inland Fisheries Ireland. "Chub a new potentially invasive species within Ireland." The following document is referenced: "National Policy for the management, development and conservation of coarse fish species in Ireland." Through FOI: the complete document with all appendices. The appropriate assessment screening for the above document cited. Required under 92/43 EEC EU Habitats Directive article 6(3) and 6(4).	Member of public	Partial Grant	12 Oct 2021

FOI Ref No	Date Request received	Subject of Request	Applicant	DECISION	DATE RELEASED
455-21-CW	14/09/2021	<p>1. I wish to obtain all records pertaining to the Coarse Fish Policy Review Group (CFPRG), which was set up in 2005 under the chairmanship of the Central Fisheries Board (CFB) and convened until 2006. Specifically, I wish to obtain records showing who and how the CFPRG was formed, all minutes of CFPRG meetings and all reports/recommendations published by the CFPRG within the 2005 to 2006 timeframe.</p> <p>2. In 2014, Inland Fisheries Ireland and the National Biodiversity Data Centre jointly published a risk assessment for the non-native fish species Chub (<i>Leuciscus cephalus</i>) under the European Communities (Birds and Natural Habitats) Regulations 2011. No other risk assessments were published for non-native freshwater fish apart from Common Carp (<i>Cyprinus Carpio</i>). Considering that Chub and Carp are classified as 'non-native fish influencing ecology' for Ecoregion 17 (Ireland) under the EU Water Framework Directive (WFD), I wish to obtain records of all the requisite risk assessments that should have been conducted for the other non-native fish in the same WFD classification namely Roach, Perch, Pike, Bream, Dace, Rainbow Trout and Minnow.</p> <p>3. On Inland Fisheries Ireland's website (www.fisheriesireland.ie), the following statement is currently published as of September 2021; "pike may be considered native or at least "naturalised" in some catchments the species is not native or "naturalised" in all catchments in Ireland". Firstly, I wish to obtain records held by IFI, which clearly list all freshwater fish that IFI have classified as "naturalised". Secondly, I wish to obtain all records that clearly define the term "naturalised" in a legislative (Irish & EU) and scientific context.</p>	Member of public	Partial Grant	12 Oct 2021

430-21-CW	08/03/2021	<ol style="list-style-type: none"> 1) On March 10th, 2016 IFI published a "Scientific Study of Adult Fish Stocks in Lough Ree (IFI/2016/1-4325)" On page 32 of this report, gave a breakdown of pike dietary habits. 109 pike were examined with 37% of these pike having fish stomach contents. Under FOI legislation, I wish to obtain the full dietary analysis of all 109 pike including the precise breakdown of stomach contents that contained ingested fish. 2) In a recently published IFI document titled "Screening for Appropriate Assessment – Lough Corrib Stock Management Plan 2021" , on page 12 a references is made to separate appropriate assessment screening report being available for the 2021 Owenriff Stock Management Plan. Under FOI legislation, I wish to obtain a copy of this Owenriff Screening. 	Member of public	Grant	1 April 2021
429-21-CW	08/02/2021	I would be very grateful if you could provide the listed details of the various roles within IFI's functional departments and the associated pay grades.	Member of public	Grant	2 March 2021
