## DETAILS OF PAGE STRUCTURE:

### RIVER NAME

District: River district

Fisheries Board code: River reference number defined by the Fisheries Boards

OS code ref: Ordnance Survey river code

EPA Hydrometric Area: Environmental Protection Agency Hydrometric area reference

EPA code ref: Environmental Protection Agency river reference number

Sea point: Latitude and Longitude in Degrees, Minutes, Seconds and decimal seconds (DD°MM'SS.ss) of river mouth

### HABITAT:

#### Area:

Catchment area km<sup>2</sup>: Area of river catchment in km<sup>2</sup>

Fluvial habitat area m<sup>2</sup>: River surface area in m<sup>2</sup>

Accessible habitat area m<sup>2</sup>: River surface area accessible to salmon in m<sup>2</sup>

<b>District</b>	Fisheries District of river detailed.
<b>River / stock</b>	River name and stock (1SW/ MSW) detailed. Indication of instances where 1SW and MSW are assessed separately and where advice is given jointly.
<b>Rod / Counter</b>	Rod catch or counter data depending upon assessment. Where counter data are used the proportion of the rod harvest caught below the counter and incorporated into the analysis is indicated as "Proportion caught below counter". The most recent year data for rod catch is based on Fishery Inspector estimates.
<b>Rod harvest / Counter: years 1 - 5</b>	Most recent five years rod catch (harvest) data or counter data if counter used for the analysis.
<b>Rod catch &amp; release: years 1 - 5</b>	Most recent five years rod catch and release data used for the analysis.
<b>Exploitation rate:</b>	Refer to Appendix II in the Report of the Technical Expert Group on Salmon, the Status of Irish Salmon Stocks in 2025 with Catch Advice for 2026.
<b>Draft catch: years 1 - 5</b>	Most recent five years of draft net catch.
<b>75% Predicted Returns</b>	Predicted 75 <sup>th</sup> percentile of returning salmon.
<b>Conservation Limit (Median)</b>	Median value of Monte Carlo conservation limit (CL).
<b>Catch option at 75% Probability of attaining CL</b>	Surplus (or deficit where value is negative) at the 75 <sup>th</sup> percentile of predicted returning salmon above (or below) the conservation limit. Capped at twice the CL if recruits per spawner >3.
<b>Proportion of CL attained</b>	The proportion of the CL achieved by the 75 <sup>th</sup> percentile of predicted returning salmon (values of less than 1 indicates a deficit and above 1 indicates a surplus)

**CASTLETOWN**

### Additional catch options for fisheries managers

This sub-section sets out the proportion of conservation limit (prop. of CL) attained, associated catch option and associated advice for fisheries management per river stock (total, 1SW or MSW) and common embayment (CB) at respective 80%, 85%, 90%, 95% and 99% probabilities of attaining conservation limit. The catchment-wide electrofishing (CWEF) value for each river stock is also included.

The advice provided is based on the standard TEGOS thresholds of:

- prop. of CL > 1 = surplus catch option identified ("Surplus");
- prop. of CL ≤ 1 and ≥ 0.65 or CWEF ≥ 17 = catch & release-only ("C&R") advised;
- CWEF ≥ 17 = catch & release-only (C&R) advised;
- < 0.65 CL and CWEF < 17 = close to all fishing ("Close");
- Prop. of CL not assessed and CWEF < 17 = close to all fishing ("Close"); and
- No data available to indicate stock status = close to all fishing ("Close").

The information is presented in the following three tables:

- **Table 1** Additional catch options per river stock at respective 80% and 85% probabilities of attaining conservation limit;
- **Table 2** Additional catch options per river stock at respective 90% and 95% probabilities of attaining conservation limit; and
- **Table 3** Additional catch options per river stock at respective 99% probability of attaining conservation limit.

**Table 1** Additional catch options per river stock at respective 80% and 85% probabilities of attaining conservation limit.
